 ivanorganista@hotmail.com

Actuary passionate about sustainable finance, data science, and education. I blend analytical rigor with a human-centered approach to *optimize processes, manage risks, and foster collective learning*.

I seek projects where I can contribute innovative solutions in sustainable finance, agroecology, or actuarial education.

Specialized in predictive modeling and probabilistic analysis, with hands-on experience designing workshops that promote financial and environmental literacy.

CORE COMPETENCIES

Statistical analysis	Interpret data using regression, hypothesis testing, and time series. Apply probabilistic models to support decision-making with Python and R.
Programming	Build predictive models and clustering solutions , automate processes, and develop user-focused websites with HTML, CSS, and JavaScript.
Actuarial modeling	Calculate reserves, insurance premiums, amortization tables, pensions, and financial risk metrics . Produce reports and business proposals aligned with Mexican regulations (Solvency II, IMSS, ISSSTE).
Financial mathematics	Assess market, credit, solvency, and operational risks. Optimize portfolios using modern portfolio theory and Value at Risk (VaR).

EDUCATION

2019–2026 B.Sc. in Actuarial Science — Faculty of Sciences, U.N.A.M. (Mexico City)
